Link: <https://ws-public.man-mn.com/portal/irj/asp?NavigationTarget=navurl://b7a9652c3a675a2a150288b0677cd9d5>

- Implementation and documentation of the service maintenance
 - Measures for parking and storage
 - Service maintenance mini
 - Service maintenance maxiaccording to specifications by the body manufacturer
- Implementation and documentation of the "time-dependent" and "time-independent" measures before handover to the customer only by a workshop authorized by MAN
- For the application of the "reactivation of the material defect liability" the proof of the implementation is required

Objective: Handover of the vehicle to the customer in a technically and optically perfect condition

„Service maintenance" Checklist

- Simpler, more structured and easily accessible

Information

- Avoidance of damage from standing through proper storage and regular inspection and care of the vehicles
- Regular inspections during storage of vehicles in accordance with the "Service maintenance" checklist before commissioning
- Implementation and documentation of the "time-dependent" and "time-independent" measures before handover to the customer only by a workshop authorized by MAN
- The aim is to hand over the vehicle to the customer in a technically and visually perfect condition

Advantages

- "Service maintenance" checklist available in the MAN After Sales Portal as well as via the relevant MAN Portals
- "Service maintenance" checklist for trucks and buses necessary after 3 months, for vans after 6 months of storage
- Reduction of scope and costs
